High Def Cameras

Nearly thirty-five years ago we pioneered video field production in the Delaware Valley, offering then state-of-the-art RCA TK-76 portable cameras and JVC 4400 U-matic decks.

Over the ensuing decades Videosmith has continued to be a pioneer in the ever-changing world of video; introducing 1" Type C, Betacam, Digital Betacam, and MiniDV to the region.

Today Videosmith offers high definition cameras, featuring variable frame rates and 10 bit 4:4:4, that record on a piece of silicon smaller than a business card. How times have changed.

But the heart and soul of Videosmith is, like it has been since 1977, our staff of dedicated professionals. We're here to assist with all your production and rental needs, going that extra mile to ensure you're thoroughly satisfied.

We look forward to continuing to provide you with the kind of service you've come expect from Videosmith. Serving the Delaware Valley Video Community for over three decades.
